New for 2019  
Onion Centro F1

New for 2019  
Carrot Nazareth

## **Terms of business**

Select Seeds is a registered seed merchant. EU seed regulations – vegetable seeds listed in this catalogue have been tested and are offered as complying with current EU rules and standards.

We supply chemically treated seed. This can be toxic and must only be used for growing purposes and on no account used for human food or animal feed. When sowing treated seed, wear butyl, rubber or pvc gloves. Wash hands and exposed skin after sowing treated seed. Empty treated seed packets must be disposed of carefully. Errors and omissions excepted.

## **Varietal characteristics**

All descriptions of varieties, varietal characteristics, periods of maturity etc, are for the purposes of general information. They are intended for guidance only, as growing methods and husbandry are outside of our control and may render such information inaccurate.

## **Payment**

In addition to online payment, we accept cheques and postal orders with completed order form by post. Cheques and postal orders should be crossed and made payable to "Select Seeds".

*For administration, postage and packing please add £2.50.*

## **Delivery**

We accept orders from any country within the EU. Delivery of seed will commence when new stock is received from our suppliers. All orders will be completed and despatched at the earliest opportunity to ensure their arrival well in advance of normal planting times.

## **General Information**

The vegetable varieties listed on the following pages have been carefully selected with the serious grower in mind. As growers ourselves we are only too aware of the need for outstanding varieties and fresh top quality seed. Our aim is to supply you with the best of both. We supply graded or precision treated seed wherever possible, which has a high germination rate, greater vigour and produces better uniformity in the resulting crop. Please note seed size has little effect on success of the final crop.

Whilst our main choice of varieties is of particular interest to exhibitors, we also stock the best varieties for the allotment grower and kitchen gardener. We are constantly searching for brand new varieties to replace those discontinued by our suppliers. We can assure you that none of the new varieties go into our catalogue until we have trialled them ourselves and are totally satisfied they are top garden performers and potential show winners. If you wish to cancel your order it must be done so in writing by letter or email with undamaged, unopened goods returned to ourselves within 28 days of receipt. The customer will receive a refund as soon as possible. However, the customer will be responsible for the cost of returns and will not receive a refund for original carriage costs.
